CAREER OBJECTIVE

Results-driven IT Professional with 7+ years of overall IT experience, including 4.6 years as a DevOps Engineer and 3 years as a Network Support Engineer & IT Executive. Currently working as a DevOps Engineer with hands-on experience in Microsoft Azure Cloud, Terraform (Infrastructure as Code), GitHub Actions, Azure DevOps Pipelines, Docker, Kubernetes, and Linux administration. Experienced in provisioning and managing Azure infrastructure, implementing CI/CD pipelines, infrastructure automation, and cloud monitoring. Strong background in Network Operations, Monitoring, and Troubleshooting across Telecom and Enterprise environments using SolarWinds, Fortinet Firewall, and LAN/WAN technologies. Currently seeking a challenging DevOps Engineer opportunity to further enhance my expertise, contribute to cloud transformation initiatives, and grow professionally in a dynamic organization.

TECHNICAL SKILLS

Cloud Platform
Microsoft Azure (VM, VNet, NSG, Azure Storage, Application Gateway, Load Balancer, AKS, Azure Monitor)

Containerization
Docker (build/push/run images), Kubernetes (deployments, services, pods, namespaces), Helm

Version Control
Git, GitHub (Branching, Pull Requests, Code Reviews)

Monitoring & Logging
Azure Monitor, Prometheus (basic), Grafana (basic)

Infrastructure as Code
Terraform (Modules, State Management, Remote Backend)

CI/CD
GitHub Actions, Azure DevOps Pipelines, Jenkins

Scripting & OS
PowerShell, Bash Shell Scripting, Linux (Ubuntu/CentOS), Windows Server

WORK EXPERIENCE

DevOps Engineer, *Team Lease Service Limited* 02/2022 – Present
Client: Devyani International Limited

- Infrastructure as Code (Terraform): Designed and deployed Azure infrastructure (VMs, VNets, NSGs, Resource Groups, Storage Accounts) using Terraform; managed state files in Azure Blob Storage; implemented modular Terraform configurations for reusable, scalable infrastructure.
- Azure Cloud Administration: Provisioned and managed Azure resources including Virtual Machines, Azure Kubernetes Service (AKS), Azure Container Registry (ACR), Virtual Networks, Subnets, and Network Security Groups (NSGs); monitored cloud resources via Azure Monitor and Log Analytics.
- CI/CD Pipelines (Azure DevOps): Built and maintained CI/CD pipelines using Azure DevOps Pipelines for infrastructure automation; implemented multi-stage YAML pipelines for Terraform workflows, Docker image build and push to Azure Container Registry (ACR); managed pipeline variables, service connections, approvals, and deployment stages.
- Containerization (Docker & Kubernetes): Built and managed Docker images; administered Azure Kubernetes Service (AKS) clusters; managed Kubernetes resources including Pods, Deployments, Services, Namespaces, ConfigMaps, and Secrets; supported container platform administration and infrastructure management.
- Version Control & Collaboration: Managed Git repositories on GitHub; followed GitFlow branching strategy; performed code reviews via pull requests; maintained README documentation and infrastructure wikis.
- Linux Administration: Managed Ubuntu/CentOS servers; performed package management, user administration, cron job scheduling, log analysis, and shell scripting for automation tasks.

- Monitoring & Alerting: Configured Azure Monitor, Log Analytics, Prometheus, and Grafana dashboards and alerts for infrastructure and application health monitoring; set up alert notifications and performed proactive monitoring to ensure high availability and timely incident response.

Network Support Engineer, *InknowTech Private Limited* 02/2020 – 02/2022

Client: Accenture – Bharti Airtel

- Monitoring Network Devices & Systems: Using SolarWinds to monitor performance, availability, and capacity of network devices and systems.
- Troubleshooting Problems: Identifying, analyzing, and resolving network issues within SLA timelines.
- Tracking Issues: Monitoring and reporting link down, link flapping, utilization, packet drops, and latency incidents.
- Incident Management: Logging and updating tickets in DT tool/Siebel; ensuring timely closure of proactive, request, outage, and complaint cases.
- Escalation Handling: Coordinating with Level 2/Level 3 teams and vendors for unresolved or critical issues.
- Root Cause Analysis (RCA): Documenting incidents, resolutions, and preventive actions to reduce recurring problems.
- Reporting: Preparing daily, weekly, and monthly reports on network health, SLA adherence, and performance metrics.
- Firewall Configuration: Hands-on experience with Fortinet Firewall configuration and troubleshooting.

Executive IT, 07/2019 – 02/2020

Marine Expert Protection & Allied Services Private Limited

- IT Support & Administration: Provided day-to-day IT support for hardware, software, and network issues; managed desktop systems, OS installations, and user administration.
- Network & Vendor Support: Assisted in LAN/WAN troubleshooting, maintained data backups, and coordinated with IT vendors for hardware/software procurement.

Executive IT, *Orsh Associates Private Limited* 07/2018 – 10/2018

- IT Support & Maintenance: Provided technical support for computer systems, printers, and network equipment; resolved hardware and software issues promptly.
- System Setup & Documentation: Installed and configured OS and software on workstations; maintained IT asset inventory and documented technical procedures.
